Form Metal Modesty, General Construction
The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Note: Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.
