

“Versteel applauds utility and function by creating a new category of contract style and substance...”

PRESS RELEASE

APRIL 2016

The Maker Project

“ Versteel applauds utility and function by creating a new category of contract style and substance.

Robust construction, simple aesthetics, and hand-made impressions all combine to provide the utmost in utility and function with The Maker Project. Versteel has revived the work table and transformed it into a work “series” that embodies an urban industrial aesthetic. Available in work, counter, and stand-up heights with heavy-duty casters or glides, the table is the center of a series which includes work tables, occasional tables, benches, and a presentation white board. Celebrating the inherent qualities of fabrication and manufacturing, the Versteel “Studio Steel” process is standard with The Maker Project. Top options range from butcher block and solid surface to more traditional laminate or veneer, with a plethora of power options available.

Get involved with the “maker movement” and connect with The Maker Project, brought to you by the friendly folks at Versteel. ”

Details

A butcher block top and heavy-duty casters not only speak to the industrial aesthetic of the series but will provide a solid work table for any environment.

THE MAKER PROJECT

Work Table

This work table may get its roots from the manufacturing floor, but it's equally at home in the modern environments of corporate, education, and hospitality.
