

PACES™

Design Maximization by: Roberto Lucci

PACES™. THE NEXT STEP IN TABLES.

Paces was inspired by the human form. When legs are positioned in a walking motion, there is a better distribution of weight and balance, making for greater strength and stability. Hence, Paces' side-by-side welded legs. It's a feat in ease and lightness, making it perfect for many locations and uses including training, conference, occasional, hospitality and dining.

NESTING

Extremely light and easy to move, it tightly nests for easy storage.

TILTING

Easily tilts vertically with a single pull of one hand.

SIZING

Available in depths of 20", 24", 30"; training tables up to 96" long.

If you're looking for new ideas and
inspiration, you've come to the right place:
