

Deci
by Versteel

Deci

“ A super-sleek and ultra-stable platform that won't wobble, wiggle, or waver when put to the test in today's most demanding and diverse environments. ”

Round top, round base, round tube.
Square top, square base, square tube.

BASES | Underneath the extremely slim profile and delicate appearance is a laser cut, solid steel plate which provides stability and balance.

Adjustable glides are incorporated into every Deci base for leveling in uneven environments.

Available in occasional (18"), standard (29"), counter (36"), and stand-up (42") heights - or choose an alternate height.

TOPS | It's super simple, pair round tops with round plates and tubes. Likewise, pair square tops with square plates and tubes.

Rectangular top shapes are available and require multiple bases (choose from round or square).

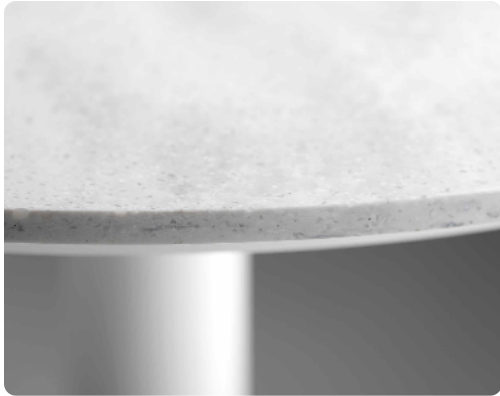

We're flexible! If you want or need a different shape or size, let's work together.

FINISHES | Tops are offered in laminate, veneer, or solid surface with a wide array of edges to select from.

For your base, choose from our extensive list of standard powder coats, chrome, or select an optional alternate color.

Custom matches, alternate finishes, unique top materials - you're only limited by your imagination (and of course, the budget and timeline).

Deci by Versteel

DESIGN | Form and function are unified in every Versteel product. **CREATE** | Individualize your specification with a multitude of finish and material options. **VERSTEEL** | Get the strength and durability that will last a lifetime!

PRODUCT TESTING STANDARDS
