

Studio Steel®

Studio Steel is a fabrication option from Versteel that celebrates the inherent qualities of manufacturing. Available on many series, the Studio Steel process embraces natural imperfections by leaving telltale signs of welding and assembly. Each component is given special attention and care during the preparation process and inspected for fit and finish before applying a powder coat finish. Choosing a clear or transparent powder coat highlights the steel, allowing the welds and tonal striations to show through.

SPECIFICATIONS

- Studio Steel is a process, NOT a finish
- All welds are left intact, there is no grinding or buffing
- Certain products will highlight the process better than others
- Clear or transparent powder coats are recommended to reveal the process
- Available on most steel products
- Many parts are inspected and welded by hand to maintain a studio/craft aesthetic
- Upcharge applies, see price list(s)

CLEAR POWDER COATS

- **Crystal** PCRY (T) Gloss sheen (true color)
- **Matte** PMAT (T) Flat sheen (true color)
- **Satin** PSAT (T) Flat sheen (yellow cast to hue)

Versteel products are designed to exceed all applicable ANSI/BIFMA standards for safety and performance.
