

Catwalk

Modular Seating

Discover new ways to
cultivate creativity and
social connections.

Flexible Interaction

Catwalk goes beyond functional design by imagining the interactive potential of flexible seating. With an omni-directional offering and varying ledge heights, each Catwalk configuration uniquely accommodates a variety of postures and purposes.

Balanced composition of colors and materials

Mix and match ledge heights for your desired setting. Low and mid ledges are positioned perfectly for relaxed leaning, sitting or perching. High ledges offer back comfort and privacy, while laminate or veneer ledges provide a space to get work done.

Powered and practical

Designed to approach from any angle, Catwalk is a modular series with diverse configurations. Keep the momentum going with unique design features and quick-access charging options. Easy, tool-free setup is made possible with Versteel's innovative Cat's Paw™ linking bracket.

Designed exclusively for Versteel by David Dahl.
