Solutions for the New Now

LEVELS

Healthy space solutions for the New Now

It's no question: the world around us is changing. This includes reimagining how we work, learn and live. We can help you prepare for the future by providing solutions that offer safety and adaptability.

Space Division

Acrylic Privacy Panels

- Panels are 24” high (23.5” with 0.5” wire management gap)
- Frosted acrylic standard
- Clear acrylic with extended lead time
- Permanent or removable mount
- Attaches to tops up to 30” wide and 72” long
- Larger sizes available as double carrel with two sections
- Mount finishes: Versteel powder coats (excludes Premium and Transparent)

Acrylic Privacy Shields

- Panels are 24” high
- Transactional style available with 4” x 10” cut out
- Frosted acrylic standard
- Clear acrylic with extended lead time
- Portable - lightweight design and requires no mounting hardware. Ideal for linking, meeting or conference tables.
- Corian® base for safety and cleanability (Designer White)

The Maker Project Whiteboard

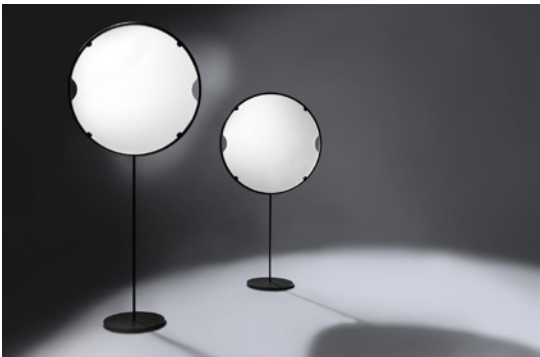

- 41” x 48” two-sided dry erase writing surface
- Writing surface is magnetic (rare earth magnets recommended)
- Three integrated shelves (two are one side only)
- Robust, industrial construction coordinates with The Maker Project collection
- Four dual heavy duty locking swivel casters
- Metal finishes: any Versteel powder coat

Eliga Whiteboard

- 43” x 42” two-sided dry erase writing surface
- Writing surface is magnetic (rare earth magnets recommended)
- One integrated shelf on each side
- Base style coordinates with Eliga series
- Four dual wheel locking casters
- Metal finishes: any Versteel powder coat

Connectivity is important for both productivity and well-being. Find togetherness while remaining physically distanced with a variety of space division choices.

OH! Privacy Screens

- Screen: frosted acrylic, powder coated metal, tackable upholstered, or acoustic upholstered
- Clear acrylic with extended lead time
- Circular or Oval screens
- Freestanding on floor
- Frame and metal screen finishes: Versteel powder coats (excludes Premium and Transparent)
- Upholstered screen: non-coated, tackable fabrics

Freestanding Privacy Screens (single and double base styles)

- Frosted acrylic standard
- Clear acrylic with extended lead time
- Base styles: ellipse, rectangle, or octagon
- Single or double base
- Single bases available with single or double upright
- Freestanding on floor
- Frame finishes: Versteel powder coats (excludes Premium and Transparent)

Freestanding Privacy Screens (with extension)

- Frosted acrylic standard on floor length screen
- Over-table extension screen available in frosted acrylic or powder coated metal
- Clear acrylic with extended lead time
- Base styles: rectangle or octagon
- Freestanding on floor and table
- Frame and metal screen finishes: Versteel powder coats (excludes Premium and Transparent)

Mobile Privacy Screens

- Screen: frosted acrylic or powder coated metal
- Clear acrylic with extended lead time
- Base styles: Brattice, Eliga, Skware, Performance, or Vela
- Four casters (quad) or three casters (tri)
- Tri style is slim to fit between tables
- Mobile on floor
- All casters are locking
- Frame and metal screen finishes: Versteel powder coats (excludes Premium and Transparent)

Personal Tables

Maintain productivity at home or wherever you find your alternative workspace. Many of our table lines offer smaller sizes with mobile and electrical options for efficiency in a small footprint.

Cleanable Seating

Products that can be effectively cleaned (and cleaned around) are vital in the new now. Poly shells, coated fabrics, and metal frames withstand frequent cleaning and disinfecting, giving you comfort with peace of mind.

Find relief with clean, safe materials

It goes without saying: keeping furniture clean is important to maintaining a safe environment. Smart material selection can help ease worries. Non-porous, resilient surfaces prevent growth while also withstanding frequent washing and disinfecting.

Powder Coat Often used in hospitals for its resilience and sterility, powder coat deters growth of communicable pathogens. Use of water and soap is recommended for routine cleaning. Disinfecting wipes, bleach solutions or isopropyl alcohol can be used for deeper cleaning and sterilization.

Laminate This non-porous top material is moisture resistant and easy to clean. Though resistance to harsh chemicals varies, most can be cleaned with commercial cleansers and disinfectants. Contact Versteel Customer Service for more information for a specific supplier.

Acrylic Its smooth, non-porous surface has lead acrylic to be the advantageous choice for partitions. Sprayway® Industrial Plastic Cleaner or a water solution that includes a mild chlorine based soap is recommended by the supplier. When using bleach solutions, rinse immediately afterwards. Do not use abrasive chemicals or window cleaner on acrylic surfaces.

Corian® The smooth surface of Corian inhibits microbial growth when properly cleaned and has been proven to be an extremely safe, sterile surfacing material. Clean frequently with diluted bleach or common household cleaners and disinfectants. Window cleaner is not recommended.

Coated Textiles Polyurethane and vinyl textiles have soil and stain resistant top coats and are bleach cleanable. Momentum recommends a 4:1 bleach solution; Mayer 10:1; Ultrafabrics 5:1. For additional cleaning information please see textile card or contact Versteel Customer Service.

Poly Shells Molded resilient polypropylene resin make up our poly shells. They are a cleanable and durable alternative to fabrics. Use soap and water for routine cleaning. Bleach cleanser, isopropyl alcohol and peroxide cleanser can be used for deep cleaning and disinfecting.

Always test a small location for reaction before using a new cleaning product over the entire surface. Prevent marks and scratches by using a soft, non abrasive cloth. Aside from non-coated fabrics, most materials on Versteel products can be cleaned with disinfecting wipes, isopropyl alcohol and peroxide. Diluted bleach solutions may also be used if properly rinsed with water afterwards. Test results for these cleaning solutions is available on our website or by requesting a copy from Customer Service.
