A special note from

Scott Schwinghammer

President + CEO

At Versteel, we believe how a product is made is just as important as the product itself. It's an accumulation of the care, intention, and expertise that goes into building it. That's why we manufacture our furniture in Southern Indiana, where we have full visibility into every step of the process. From American steel to local supply chains, we rely on trusted materials and an exceptional team to deliver lasting quality.

When I spend time in our facilities, I'm reminded of what really sets Versteel apart: It's the people. The welders with a practiced eye, the builders who fine-tune every joint, the powder coaters who finish each piece with precision. These are the individuals who bring our products to life. Their skill, pride, and attention to detail are behind everything we make.

Yes, we're proud of our versatility, our integrity, and our design. More than anything, though, we're proud of our people. They carry forward our values and ensure that every product that leaves our doors is built to serve, built to last.

Thank you for supporting American manufacturing, and for trusting in the people who bring our furniture to life every day.

Our People are our Heart and Soul.

Warranty

All table and seating products manufactured by Versteel are guaranteed by a Lifetime Warranty against defects in materials and workmanship from the date of purchase. Products manufactured/adapted for use in a Pavilion or Pop-Up setting are covered under a three (3) year warranty against defects in materials and workmanship from date of purchase.

Electrical items manufactured by Versteel are guaranteed against defect for a period of one (1) year from date of purchase.

Electrical items not manufactured by Versteel are covered by the manufacturers under their specified warranty.

Consumables such as gas cylinders, casters, and glides are covered for a period of one (1) year. Adjustable height bases with crank and counterbalanced components are covered under a two (2) year warranty. Versteel will not cover labor costs associated with replacing the casters or glides.

Wood veneer is warranted for a period of ten (10) years. Butcher block is covered under a one (1) year warranty. Natural variations in grain, color, or texture of wood should not be construed as defects under this warranty.

Versteel will replace or repair (at our discretion) without cost to our customers any item manufactured by Versteel found to be defective as a result of defective material or workmanship and is still owned by the original purchaser. We will not, however, repair any item which is not properly installed, maintained, is abused, or subject to any use other than that which was originally intended. Warranty does not cover normal wear and tear of the product, which is expected over the course of ownership. In no event shall liability under this warranty exceed the original purchase price.

Pavilion and Pop-Up products must be covered and out of direct sunlight. Use location must be a minimum of 100 miles from saltwater.

Warranty on plastic laminates, solid surface, non-standard materials, and upholstery is not covered by Versteel but is covered by each manufacturer under their specified warranty only. All foams, fabrics, and vinyls are prone to stretch and loosen over time through normal use. This natural effect, called puddling, is covered for a period of one (1) year from the date of purchase.

There are no other warranties expressed or implied.

Care of Laminate Surfaces, T-Mold, Bumper, PVC Edges and Urethane
Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface, moving with the pattern and follow with a clean, dry soft cloth. When a wood edge exists, follow instructions found under "Care of Wood Edges and Veneer Surfaces".

Care of Wood Edges and Veneer Surfaces
Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

For an additional safeguard, use a protective surface pad. Doing so could ensure a lasting finish by protecting your furniture from possible damage caused by pens and sharp objects.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Care of Corian® Surfaces
Clean regularly with a cloth or sponge wrung out in warm soapy water. You can also use ammonia-based cleaners or commercial cleaners recommended for use on Corian® surfaces. Wipe up any water spills immediately so as not to leave a film that makes the finish look blotchy.

Care of Powder Coat Work Surfaces
Clean with warm water and mild soap and rinse with clean, warm water. Windex Multi-Surface Disinfectant and Windex All Purpose cleaner can be used for deep cleaning. Using a pump spray bottle, apply a normal amount of cleaner onto a clean microfiber or paper towel. Wipe the desired area until dry. Do not spray directly onto the surface or let sit un-wiped for an extended period.

Care of KrystalCast® Surfaces
Clean with a dish soap and water mixture in a spray bottle with a Green Scotch Brite 3M scrub pad to loosen all dirt and goo (including oil and wine stains, etc). Dry with a clean dry cloth. Do not use solvents such as acetone, lacquer thinner, gasoline, undiluted alcohol or benzene.

Care of Powder Coat and Nickel
Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Care of Chrome Bases
Clean with a wet cloth or window cleaner. For scuff marks or heavy soiling, a non-abrasive automotive chrome polish can be applied as directed.

Maintenance of Mechanical Parts
Clean any lint or debris from the moving parts of the E-Z install tilt or folding base mechanisms. Do not apply lubricant. Mechanisms have been designed and tested to not require lubrication under normal conditions.

Care of Upholstered Tack Panels
For Versteel standard fabrics and vinyls, consult the back of the appropriate swatch card for cleaning codes and any specified instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specified instructions pertaining to your particular fabric.

Base Construction Specifications

Base Construction

Versteel bases are constructed of a column, base and a mounting top plate in many styles and sizes.

1) Mounting top plates attach to the column to allow attachment to the top.

Fixed Bases

Fixed bases feature a heavy gauge plate and are field installed into marked pre-drilled positions on the opt with hardware provided.

Tilt Bases

The 10 gauge upper plate is factory installed on the table top. The 7 gauge lower formed plate is attached to the base column.

Folding Bases

Folding bases feature a formed pan with welded construction that is connected to a wire formed frame. The wire formed frame acts as stacking bumpers and carrying handles for the table. Bases can be field installed into marked pre-drilled positions with provided hardware or request the option for factory installation.

2) Columns are constructed of 16 or 14 gauge tubular steel in a variety of shapes and diameters appropriate to the series and base styles.

3) Base rails, feet or discs attach to the column and are heavy gauge steel to create a very stable table with glides to provide ¾" vertical adjustment for leveling the table.

Base Shipping Specifications

All series TC, T1, T2 bases, W2, P3, P4 columns and D1 disc base ship assembled from the factory. Brattice, Uno and Vela Series X1 and X4 bases and Vela Y3 base also ship assembled from the factory. Performance X1 and X4 bases ship unassembled for field assembly.

These linking configurations suggest some of the possible configurations that can be created with standard table shapes.

If you specify table link for a specific configuration and/or table size, please provide us with a sketch or reference one of the following configurations to allow us to verify your layout.

Fixed Configuration Conference Tops

Conference tops may use fixed configurations to achieve larger than normal sizing and seating accommodations, but there are some specific items that must be considered. These large conference tops are generally greater than 60" wide and 240" long.

By contacting Versteel Customer Service with your vision we can help you engineer and produce your table. Below is a list of important points we will address.

MATERIAL YIELD

Most laminate is available in a maximum sheet size of 60" x 144". Versteel can design shapes and linking configurations that will maximize material yield.

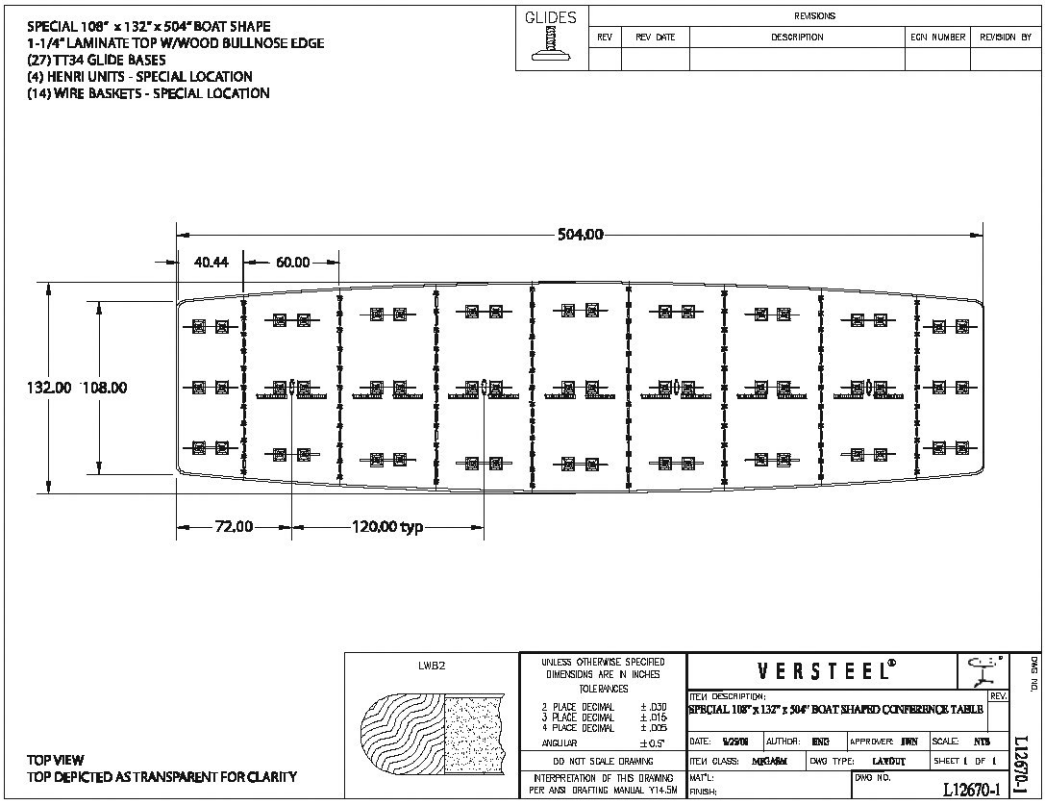

LAMINATE PATTERNS

Versteel can minimize seam lines by designing and positioning the linking configuration to take full advantage of your laminate pattern.

BASES AND JOINTS

Larger sections can be produced to limit the number of bases and joints required.

At right is a typical Versteel drawing of a large, fixed configuration conference table. The extremely large size (504" x 132") required nine (9) sections and twenty-seven (27) bases. Power and data options have been incorporated into the drawing.

Configuration Guidelines

Often we receive requests to assemble room configurations that one would assume are very easy. but without the proper input, it is not so simple. Below are some common questions that will help to define your needs as well as enable us to help you specify your tables.

Define Your Space

Start by asking yourself what you really want to accomplish in your room.

How will your room be used? Will you need breakout groups, is it a classroom with rows, or a boardroom? Do you need a T-shape, U-shape, or hollow square table group? Are there any special modifications that are specific to you application?

Besides the size of your room, here are some other items that you should take into consideration:

- instructor or speaker area
- wall with boards and/or audiovisual equipment
- door and window locations
- anything else which may interfere (columns, steps, ramps, HVAC, etc.)

Define Your Needs

Your table considerations should begin by thinking about the need for the following items:

- modesty panels
- linking
- power and data
- wire management and grommets
- keyboard trays
- fixed, folding or tilt bases
- special needs (alternate or adjustable height)

Your Seating considerations should begin by thinking about the need for the following items:

- assume a 30" width per person
- mobility (casters)
- stacking or storage issues
- usage and wear (upholstery or wood)
- adjustable height
- function (task specific or multiple)

Common Room Layout Guidelines

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

By using the guidelines below and the information that you supply (from answering the previous questions), Versteel can help you specify he tables and seating you need to make your space function at its maximum potential.

Between Rows Allow Four Feet (4')

If rows are used, four feet (4') between rows is considered adequate in order to provide space for movement.

Instructor Allowance of Eight - Ten Feet (8'-10')

A minimum of eight to ten feet (8'-10') should be allowed for the instructor's space, from the wall to the approach side of the first table row.

Back Wall Allowance of Seven Feet (7')

Space consideration for the back wall is necessary. A minimum of seven feet (7') from the back wall to the user's side of the last table is suggested.

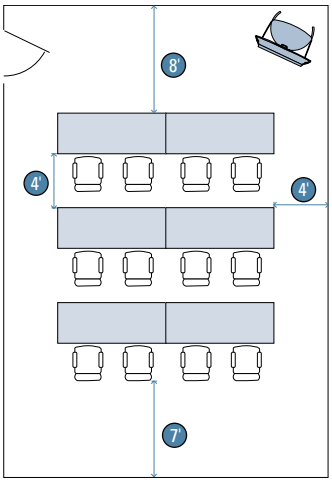

Side Wall Allowance of Four Feet (4')

A minimum of four feet (4') from a side wall to the edge of a table should be incorporated into your configuration. Increase the distance for larger rooms.

Aisle Allowance at Four Feet (4')

If an aisle is needed, allow a minimum of four feet (4'). This dimension should increase with your room size.

The drawing below illustrates the guidelines above.

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

Reference information here originally appeared in Architectural Graphic Standards, published by John Wiley and Sons; and in US Government publications for compliance with the ADA (Americans with Disabilities Act).

Also, be sure to check US Government publications for compliance with the ADA (Americans with Disabilities Act).

Common Seating Dimension Requirements

General spacing of thirty inches (30") of lateral space per chair at a table is standard. A minimum of twenty-four inches (24") may work, but will depend upon your chair style and table dimensions. Allow a minimum of thirty to thirty-six inches (30"-36") for wheelchair space at a table.

Most wheelchairs are designed to fit beneath a standard table with a twenty-nine inch (29") table top height. However, some wheelchairs require tables with tops at thirty-two inches (32") in height. Allow an additional twelve to eighteen inches (12"-18") in aisles where wheelchairs may be situated back to back.

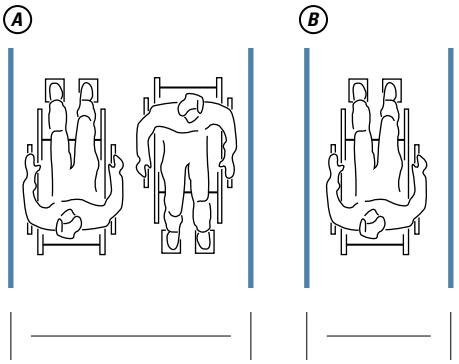

A rule of thumb for cafeteria style seating is to allow a minimum of twelve square feet (12 ft²) for each seat.

Since every space has its own unique size and function, it is important that you consider the aforementioned guidelines when planning your space. Be sure to allow adequate space for aisles and plan your rooms around walls and other permanent fixtures such as doors or windows. Anticipate the type of activity that will be going on and plan enough space at the table for every movement of personnel when seated.

Don't forget to consider power and data needs also. For help planning and selecting the power and data options that are right for your space, see the Power and Data price list.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Tops
Eliga X base tables are available in round and square top shapes. Rectangle, racetrack, boatshape and arc boatshape top shapes are available with the E-series tables, and the End-Sit tables are standard with rectangle top shapes. The laminate and veneer tops in the Eliga series are 1" thick with square corners.

Bases
The X base is constructed of a single square tube upright with four Eliga shaped feet. The E-Series and End-Sit table bases feature a parallelogram tube construction. The round and square tops can be specified with fixed or tilt bases in either 29" standard table height or 42" stand-up table height. The standard table height for the E-series and End-Sit tables is 29". When End-Sit tables are configured in a group setting the angles of the legs permit comfortable "end-seating" by creating a cove where the user can nest.

Modesty Panels
The 24" and 30" wide tables with four post legs may be specified with or without a modesty panel. The rectangle sliding table has a fixed modesty panel.

Features + Options
Tables are standard with nylon adjustable glides except for slim-tilt tables which are standard with casters. Optional casters and table link are available where applicable. See individual pricing pages for additional available features such as fixed or slim tilt bases and sliding tops.

Power + Data
To complete your specification, power and data along with wire management options can be added to your table. Refer to the Power + Data Price List. All End-Sit bases feature an integrated wire manager in the leg.

Entourage
Create a complete conference area with cabinets, carts, wall boards and lecterns that coordinate with Versteel tables and seating. Available in a variety of sizes and configurations, the Entourage collection combines a powder coated steel frame for rigidity with laminate surfaces for durability or wood surfaces for warmth. Door construction allows for the insertion of 3form® panels. Many models and sizes are available with casters for mobility.

Cabinet Doors
Cabinet laminate doors are available with two different door options: all laminate doors or doors with a 5/16" Aluminum frame.

Pulls
Cabinets with doors are available with two different pull options. See pricing pages for styles and codes. Carts with doors will have a round knob pull.

Casters and Glides
The locking casters on the cabinets, carts and lecterns are grey two-tone soft wheel. An optional black caster is available, see page 186. Casters are not available on 48", 60" and 72" cabinets with floor doors or any 84" cabinets. Glides for the cabinets are adjustable and made of heavy duty steel.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped pre-drilled for field installation of bases and accessories.

PVC Flat or Fluted Edge
Edge of 2mm PVC hot melt banded to the top with ⅛" radius at the top and bottom. Available with 1 ½" radius corners or square corners.
Offered in twenty-one (21) standard colors.

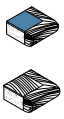

Wood Flat or Fluted Edge
Wood banding hot melt banded to the top with ⅛" radius at the top and bottom. Available with 1 ½" radius corners or square corners.
Offered in Ash, Cherry, Maple or Walnut materials.

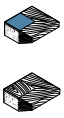

Reverse Bevel Acrylic

Offered in Ash, Cherry, Maple or Walnut materials.

Tops
Laminate tops are 1 ¼" thick and are offered with fixed or slim-tilt bases. Tables must be in lowest position to tilt.

Base Styles
The Sky Adjustable Height table is available in six base styles to coordinate with the following tables series: Brattice, Eliga, Performance, Skware, Troupe and Vela. The rectangle tables offer T or cantilever bases in all base styles except Troupe. Troupe style tables do not offer cantilever bases. Columns are round on all base styles.

Sky bases are intended to coordinate with fixed height tables in other series. Bottom rails will match fixed height tables; however, the column may differ to accommodate the adjustable height mechanism.

Base Materials
The base is available in Versteel's standard powder coat offering or Studio Steel®. Troupe style tables are not available with Studio Steel® or Transparent powder coat. Chrome or Nickel is not available on any Sky Table

Casters
Tables are standard with two locking casters on the user side and two non-locking casters on the approach side. Optional glides are available at no upcharge.

Dual Wheel, black 2" diameter casters are standard on Brattice, Eliga, Performance, Skware and Vela base styles. The Troupe base includes the 3" hollow wheel black casters. Each caster is fitted to a reinforced caster receiver.

Adjustable Height
Sky Adjustable Height tables offer infinite adjustability from sit to stand or anywhere in between. Tables with casters (standard) have a 29" to 42" height range and those with glides have a 27" to 40" height range. Troupe style tables with casters have a 30" - 43" height range and those with glides have a 27" to 40" height range. All Sky tables are ADA compliant.

Operational Standards
These patented height assist tables are manufactured using pneumatic cylinders. The greater the weight placed on the table top, the greater the effort will be required to operate the pneumatic assist. This inverse applies when lowering the table.

Wire Management
The slim-tilt tables include two clear plastic wire managers which are formed t create a J channel. In addition to housing wires, these channels also act as a bumper between nested tables to prevent table top damage.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate. A backer sheet is laminated to the underside of the top.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with ⅛" radius at the top and bottom. Available with 1 ½" radius corners or square corners.

Laminate
Versteel's standard offering of laminates includes over 900 laminates from Formica, Nevamar, Pionite and Wilsonart.

Laminate manufacturers change standard offerings frequently, making it possible a standard product can become unavailable. Versteel cannot be responsible for any inconvenience this may cause.

Studio Steel®
Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process $165

Powder Coat Finishes
All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Tops
Laminate and veneer tops are 1 ¼" thick. Corian® tops have a 1" top thickness. All are standard with radius corners.

Leg Materials
The elliptical legs are available in Versteel's standard or Studio Steel® process. All standard powder coat finishes are available in addition to Chrome or Nickel when Studio Steel is not specified.

Features
The 30" tall tables are available with two (2) USB ports integrated into two or four legs. If no USB ports are desired the legs will have Black Anodized end caps which match the Black Anodized tubular understructure. A 10' long power infeed cord provides power to all USB ports. Tables are standard with 2" diameter nylon adjustable glides. Glides allow .5" adjustment of the table.

Wire Management
The tubular understructure incorporates wire management. Legway wire managers are included when tables are ordered with USB ports.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped with rectangular understructure attached and pre-drilled for field installation of bases and accessories.

Corian® Construction
Tops are ½" Corian® with a 7/16" thick plywood subtop glued to the bottom side with a ½" Corian® rim applied to conceal the plywood subtop. The underside is bored to allow pressing in metal screw inserts for field installation of the legs and/or connectors.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with ⅛" radius at the top and bottom.
Offered in twenty-one (21) standard colors.

Reverse Bevel Acrylic

Edge of 2mm acrylic edge banding hot melt banded to MDF core. A reverse bevel is then cut into the edge exposing the MDF on the reverse bevel. The MDF is then clear coated.

Wood Flat or Fluted Edge

Wood banding hot melt banded to the top with ⅛" radius at the top and bottom.
Offered in Ash, Cherry, Maple or Walnut materials.

Corian® Eased Square Edge

A traditional 1" flat edge with a small radius where horizontal surfaces meet vertical for comfort and a softened aesthetic.
Offered in ten (10) standard colors.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and inherent qualities of raw steel to show through. Chrome and Nickel are not available with the Studio Steel process.

Tops
The ⅞" thick laminate or veneer Rectangle and Arc Rectangle top shapes are available in 24" and 30" widths and lengths of 42", 48", 60" and 72".

TIM Base Construction
Tim table bases are constructed of 14 gauge round tube upper legs with 16 gauge round tube telescoping height adjustment lower leg sections. Guide bushings inside the legs are molded from nylon bushing materials to provide smooth, quiet operation of the height adjustment feature. The height adjustment button is made of solid steel with a spring actuated movement. A Height Adjustment Lock Out Kit is available if you wish to lock out the push-button height adjustment feature.

Fixed Bases
Fixed bases feature a ¼" thick mounting top plate and are field installed into pre-drilled holes with hardware provided. TIM tables with fixed bases include the push-button height adjustment feature.

NOTE FIXED BASES ARE SHIPPED SEPARATE FROM THE TOP AND ONLY REQUIRE SCREW ATTACHMENT TO ASSEMBLE

Tilt-Nest-Fold Bases
Tilt feature is cable actuated with the pull of a release handle located under the table top on the end of the surface. The cable operates two brake control mechanisms mounted on each end of the table to support the top. Nest-fold features are constructed of die cast metal components and 14 gauge round tube, fully enclosed in reinforced plastic housings for smooth, quiet operation.

NOTE THE TABLE IS SHIPPED FACTORY ASSEMBLED FOR IMMEDIATE USE AFTER UNCARTONING

Table Heights
TIM tables are constructed with push-button height adjustment to provide five inches of vertical movement. The top leg hole position will set the surface height at 27" with the third from the top hole for 29" standard seated task, and the bottom round hole providing the 32" surface height required for wheelchair applications. The adjustment holes are at 1" spacing increments.

Casters + Glides
TIM tables are standard with two locking and two non-locking gray two-tone soft-wheeled non-hooded casters. Tables can be ordered with optional glides. This option reduces the overall table cost and keeps the tables in position without the need to lock the casters. Base glides reduce the overall table height by 9/16".

Power + Data
To complete your specification, power and data along with wire management options can be added to your table. Refer to the Power + Data Price List.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped pre-drilled for field installation of bases and accessories.

Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Laminate Modesty, General Core Construction
The modesty panel is constructed of ⅞" thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. See individual styles below for panel heights per series. Modesty panel extends the length of the top and is located along the front edge of the table for maximum leg and knee clearance.

Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

Removable Modesty (RemMod RM)
The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". Finish details match the top unless specified differently.

Hanging Modesty (HangMod HM)

Form Metal Modesty, General Construction
The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

Fixed Form Modesty (FixFormMod XF)
The Fixed Form Modesty panel is mounted to the top with screws through steel brackets. The fixed modesty panel must be field installed into pre-drilled positions in the top. All mounting hardware is packed with the modesty panel. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available. The panel will be radius with round holes.

Fixed Lightweight Form Modesty
(FixLightweightFormMod XL)
The Fixed Lightweight Form Modesty panel is a lightweight version of the Versteel Form Modesty. It is a formed steel perforated panel that is mounted to the top with screws through steel brackets. It must be field installed into pre-drilled positions in the top. A deep channel in the back of the panel allows for the routing of power and data cables inside of the modesty. Mounting hardware is packed with the modesty panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available. The panel will be radius with round holes.

Removable Lightweight Form Modesty
(RemLightweightFormMod RL)
The Removable Lightweight Form Modesty panel slides into heavy duty steel brackets that are mounted to the top. Laminate Modesty, General Core Construction
The modesty panel is constructed of ⅞" thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. See individual styles below for panel heights per series. Modesty panel extends the length of the top and is located along the front edge of the table for maximum leg and knee clearance.

Fixed Modesty (FixMod XM)
The Fixed Modesty panel is mounted to the top with screws through steel brackets and must be field installed into pre-drilled positions in the top. Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

Removable Modesty (RemMod RM)
The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". Finish details match the top unless specified differently.

Hanging Modesty (HangMod HM)
The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. All hanging modesty panels are 8½" high. Finish details match the top unless specified differently.

Form Metal Modesty, General Construction
The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Laminate Modesty, General Core Construction
The modesty panel is constructed of ⅞" thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. See individual styles below for panel heights per series. Modesty panel extends the length of the top and is located along the front edge of the table for maximum leg and knee clearance.

Fixed Modesty (FixMod XM)
The Fixed Modesty panel is mounted to the top with screws through steel brackets and must be field installed into pre-drilled positions in the top. Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

Removable Modesty (RemMod RM)
The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Panel is 10" high with the following exceptions: Eliga (E1 bases) 7", Paces and Vela 8". Finish details match the top unless specified differently.

Folding Modesty (FoldMod FM)
The Folding Modesty panel is mounted to the top with heavy duty hinge assemblies. A sliding brace supports the modesty panel in the set-up position and also holds the modesty panel in place in the stored position. Panel is 10" high with the following exception: Vela 8". Finish details match the top unless specified differently.

Hanging Modesty (HangMod HM)
The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. All hanging modesty panels are 8½" high. Finish details match the top unless specified differently.

Form Metal Modesty, General Construction
The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

Fixed Form Modesty (FixFormMod XF)
The Fixed Form Modesty panel is mounted to the top with screws through steel brackets. The fixed modesty panel must be field installed into pre-drilled positions in the top. All mounting hardware is packed with the modesty panel. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available. The panel will be radius with round holes.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

Folding Form Modesty (FoldFormMod FF)

Troupe Media Walls can be specified with either a rectangle or D-shaped top. Rectangle tops are 42" or 48" wide and 60" or 72" long. The D-shaped tops are 54" wide and 60" or 72" long. Tops are mounted to the 72" tall media wall and can be specified in 30", 36" or 42" table heights. The media wall is 5½" deep with a removable back panel which allows access to wires.

The media wall panels are black thermally fused laminate with deep linear lines that enhance the color with a coordinating PVC edge. All metal components of the media wall are Ebony powder coat.

Tops
The 1 ¼" rectangle and D-shaped tops are available in laminate or veneer. Tops are mounted to the media wall and supported with two bases. For additional support a stretcher rail is included.

Stretcher Rails
Stretcher rails run diagonally from leg to leg and mount to the case. Rails are 2" tall with a distance of 10" from bottom rail to the floor. The fully welded stretcher rails are the same color as the legs.

Leg Accent
As an added feature all Troupe legs have a metal accent piece. This appealing design aesthetic allows the designer or specifier to specify one color for a monochromatic look or select two coordinating powder coat colors enhancing the design beauty of the table.

Apron
A 2" angle iron apron is mounted under the top for added stability. Apron is the same color as the accent pieces and will be mounted to all four sides of the table.

Grommets
A black grommet with a 2¼" inside dimension will be factory installed 3¾" below the underside of the table top and centered on the media wall. One additional grommet will be shipped with each media wall that can be field installed if desired. The additional grommet will require a 2½" cutout.

Power + Data
To complete your specification, power and data along with wire management options can be added to your table. Refer to the Power + Data Price List.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.
