**Tops**

Eliga X base tables are available in round and square top shapes. Rectangle, racetrack, boatshape and arc boatshape top shapes are available with the E-series tables, and the End-Sit tables are standard with rectangle top shapes. The laminate and veneer tops in the Eliga series are 1" thick with square corners.

**Bases**

The X base is constructed of a single square tube upright with four Eliga shaped feet. The E-Series and End-Sit table bases feature a parallelogram tube construction. The round and square tops can be specified with fixed or tilt bases in either 29" standard table height or 42" stand-up table height. The standard table height for the E-series and End-Sit tables is 29". The 24" and 30" wide tables with four post legs may be specified with or without a modesty panel. The rectangle sliding table has a fixed modesty panel.

**Features + Options**

Tables are standard with nylon adjustable glides. Optional casters and table link are available where applicable. See individual pricing pages for additional available features such as fixed or slim tilt bases and sliding tops. Base and top options can also be found on page 72.

**Laminate Modesty, General Core Construction**

The modesty panel is constructed of  $\frac{7}{8}$ " thick, 45-50 lb. medium density particle board surfaced with high pressure laminate face on both sides. See individual styles below for panel heights per series. Modesty panel extends the length of the top and is located along the front edge of the table for maximum leg and knee clearance.

**Fixed Modesty (FixMod XM)**

The Fixed Modesty panel is mounted to the top with screws through steel brackets and must be field installed into pre-drilled positions in the top. Panel is 10" high with the following exceptions: Eliga (EI bases) 7", Paces and Vela 8". All mounting hardware is packed with the modesty panel. Finish details match the top unless specified differently.

**Removable Modesty (RemMod RM)**

The Removable Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to keep the modesty panel in position or loosen to remove the panel. For storage, the modesty attachment pins can be rotated 90° to prevent marring of the top surfaces. Panel is 10" high with the following exceptions: Eliga (EI bases) 7", Paces and Vela 8". Finish details match the top unless specified differently.

**Hanging Modesty (HangMod HM)**

The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. All hanging modesty panels are 8½" high. Finish details match the top unless specified differently.

**Form Metal Modesty, General Construction**

The modesty panel is constructed with an aluminum extruded back panel and a perforated hinged steel door. There are three (3) separate unobstructed channels that allow the routing of power and data cables, with a wire exit on the back for the top and middle channel. The Form Modesty panel is 10" high and extends the length of the top. The Form Modesty panel is located along the front edge of the table for maximum leg and knee clearance. Accessory end cap trim kit available.

**Fixed Form Modesty (FixFormMod XF)**

| <b>Note:</b> Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. **Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.

**Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.

**Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.

**Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.

**Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.

**Note:** Training tables are often used with lightweight computer accessories. For heavy duty applications, such as large scale computer equipment, multiple monitor mounts, etc., Versteel suggests adding a third leg or stretcher. The price of the 84", 90" and 96" models include a stretcher rail required for additional support. Contact Customer Service if you have specific application concerns or questions.
