**VERSTEEL**

**Tops**

Eliga X base tables are available in round and square top shapes. Rectangle, racetrack, boatshape and arc boatshape top shapes are available with the E-series tables, and the End-Sit tables are standard with rectangle top shapes. The laminate and veneer tops in the Eliga series are 1" thick with square corners.

**Bases**

The X base is constructed of a single square tube upright with four Eliga shaped feet. The E-Series and End-Sit table bases feature a parallelogram tube construction. The round and square tops can be specified with fixed or tilt bases in either 29" standard table height or 42" stand-up table height. The standard table height for the E-series and End-Sit tables is 29". When End-Sit tables are configured in a group setting the angles of the legs permit comfortable "end-seating" by creating a cove where the user can nest.

**Modesty Panels**

The 24" and 30" wide tables with four post legs may be specified with or without a modesty panel. The rectangle sliding table has a fixed modesty panel.

**Features + Options**

Tables are standard with nylon adjustable glides except for slim-tilt tables which are standard with casters. Optional casters and table link are available where applicable. See individual pricing pages for additional available features such as fixed or slim tilt bases and sliding tops.

**Power + Data**

To complete your specification, power and data along with wire management options can be added to your table. Refer to the Power + Data Price List. All End-Sit bases feature an integrated wire manager in the leg.

**Whiteboard**

To complete your training room or collaborative environment an Eliga mobile whiteboard can be added to your specification. The whiteboard features dual-wheel locking casters, generous two-sided dry erase writing surface and a shelf on each side for marker and eraser storage. Whiteboard is available in all Versteel powder coat colors.

**Laminate and Veneer, Standard Core Construction**

The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped pre-drilled for field installation of bases and accessories.
