VERSTEEL

**Tops**

Laminate tops are 1 1/8" thick and are offered with fixed or slim-tilt bases. Tables must be in lowest position to tilt.

Base Styles

The Sky Adjustable Height table is available in six base styles to coordinate with the following tables series: Brattice, Eliga, Performance, Skware, Troupe and Vela. The rectangle tables offer T or cantilever bases in all base styles except Troupe. Troupe style tables do not offer cantilever bases. Columns are round on all base styles.

Sky bases are intended to coordinate with fixed height tables in other series. Bottom rails will match fixed height tables; however, the column may differ to accommodate the adjustable height mechanism.

Base Materials

The base is available in Versteel's standard powder coat offering or Studio Steel®. Troupe style tables are not available with Studio Steel® or Transparent powder coat. Chrome or Nickel is not available on any Sky Table

Casters

Tables are standard with two locking casters on the user side and two non-locking casters on the approach side, with the exception of tables with a Vela base style. Vela base style tables will have four locking casters. Optional glides are available at no upcharge.

Dual Wheel, black 2" diameter casters are standard on Brattice, Eliga, Performance and Skware base styles. The Troupe base includes the 3" hollow wheel black casters and the Vela base includes the series-specific, unique Vela-profile 3" diameter casters. Each caster is fitted to a reinforced caster receiver.

Adjustable Height

Sky Adjustable Height tables offer infinite adjustability from sit to stand or anywhere in between. Tables with casters (standard) have a 29" to 42" height range and those with glides have a 27" to 40" height range. Troupe style tables with casters have a 30" - 43" height range and those with glides have a 27" to 40" height range. All Sky tables are ADA compliant.

Operational Standards

These patented height assist tables are manufactured using pneumatic cylinders. The greater the weight placed on the table top, the greater the effort will be required to operate the pneumatic assist. This inverse applies when lowering the table.

Wire Management

The slim-tilt tables include two clear plastic wire managers which are formed to create a J channel. In addition to housing wires, these channels also act as a bumper between nested tables to prevent table top damage.

Laminate and Veneer, Standard Core Construction

The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate. A backer sheet is laminated to the underside of the top.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with 1/8" radius at the top and bottom. Available with 1 1/2" radius corners or square corners.

Offered in twenty-one (21) standard colors.

Wood Flat or Fluted Edge

Wood banding hot melt banded to the top with 1/8" radius at the top and bottom. Available with 1 1/2" radius corners or square corners.

Offered in Ash, Cherry, Maple or Walnut materials.

Bumper Edge

Exposed ply core banding with rubberized 5/8" width bumper in the center of profile. Corners with 1 1/2" radius are available on tables with 1 1/4" edge thickness.

Laminate

Versteel's standard offering of laminates includes over 900 laminates from Formica, Nevamar, Pionite and Wilsonart.

Laminate manufacturers change standard offerings frequently, making it possible a standard product can become unavailable. Versteel cannot be responsible for any inconvenience this may cause.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$165

Powder Coat Finishes
