Versteel Height Adjust tables seamlessly integrate into any work environment. They add flexibility to the workspace by allowing adjustable height table options in virtually any application. Versteel offers a multitude of adjustable height options: Motorized, Crank, Pin, Counter Balance, and Pneumatic, as well as alternative fixed height tables.

**EASE OF USE**

Whether the touch of a button or the crank of your hand, Versteel makes achieving alternate heights simplistic.

**ALTERNATE HEIGHT**

Versteel tables are also available in alternate heights. Some height applications may require a stretcher rail.

**POWER + DATA**

Height Adjust is also available with power and data options in the table top for complete connectivity. Check table series for stipulations.

**Counter Balance Pneumatic Height**

Available with single T bases or double T bases (centered), on a radius or square foot. A lever positioned under the table adjusts the table up or down.

**Crank Adjustable Height**

With a crank ratio of 8 cranks per inch, this makes achieving alternate table heights quick and easy. Available with single T bases and a radius or square foot.

**Motorized Height**

PE, VE (T1 and TC bases)  
With motorized adjustment, the top can be moved to any position at the touch of a button. Adjustability is easy with four programmable height settings.

**Pneumatic Height**

BR, PE, UNO, VE (T1, TC, X1, D1 bases)  
Pneumatic height adjusts to the most common ergonomic heights with a simple turn of a handwheel.

**Pin Height**

PE, TIM, WA  
The spring loaded push-pin style mechanism combines with mobility to make a simplistic all-around table. A locking mechanism is also available for fixed height applications at any setting.
